

North Fork Dam Estacada, Oregon

Client:

Portland General Electric
Portland, Oregon

Contract Value:

\$980,000

Project Timeline:

Started: April 2003
Completed: January 2004

Project Highlights:

- Installation of 60'x50' bulkhead dewatering system
- Install new seals, sandblast and paint three gates
- Innovative bulkhead design & installation
- Limited access requirement necessitated the use of a crane barge

The project involved the installation of a 60' x 50' bulkhead dewatering system and installing new seals, sandblasting, and painting the three gates at Portland General Electric's North Fork Dam on the Clackamas River. The project was completed in November 2003.

AAC assembled a small crane barge on the Clackamas River in order to perform work with limited access
